Melissa, Would it be possible to also collect a 40mL vial, unpreserved for each sample? We are not sure what impact the preservation will have on the MCHM/PPH constituents and this will also give us an opportunity to run on HPLC/UV or LC/MS/MS. Also, do you anticipate any soils being collected? Cindy From: Linden, melissa Sent: Monday, January 27, 2014 1:33 PM To: Caporale, Cynthia Subject: Update on samples from West Virginia Chemical Leak Hi Cindy, The sampling has changed to be potentially 5-7 sample locations. Would that still be feasible for Ft. Meade to run? Thanks, Melissa	To: From: Sent: Subject:	Linden, melissa[linden.melissa@epa.gov] Caporale, Cynthia Tue 1/28/2014 1:23:57 PM RE: Update on samples from West Virginia Chemical Leak
